Tax Account Analysis

Ryan’s Tax Account Analysis practice offers the premier tax interest and penalty review program in the country. Ryan TAARP®—our proprietary tax account analysis review program—delivers incredible value and results related to conceptual issues involving interest law, statutes of limitations, claims for refunds, global interest netting, Internal Revenue Service (IRS) transcription comprehension, and other IRS practice and procedure matters. We can assist even the most sophisticated tax departments in securing interest refunds from the IRS and state tax authorities or resolving other tax account related issues. Our professionals understand each client situation is unique and complex, so we tailor our services specifically to your company’s individual needs.

Ryan TAARP® is the industry’s leading proprietary tax account analysis review program designed to meet the unique and complex nature of our clients through a comprehensive suite of services that helps:

• Determine the correctness of IRS or state taxing authority interest and penalty calculations, including global netting, through a comprehensive review process

• File claims for refunds and manage the entire administrative process, including appeals and technical advice requests to the IRS national office

• Secure expeditious refunds from originally filed returns, quick refunds of estimated taxes, and tentative carry-back allowances

• Develop proactive cash management strategies, including effecting beneficial transfers of payments between tax accounts

• Analyze the advantages that may result from making advance payments of tax or deposits to suspend the running of interest

• Resolve IRS or state transcripts of tax account-related issues
Our proprietary Ryan TAARP® methodology greatly minimizes our client’s time and resources during an engagement. Our reviews are primarily performed and completed off-site, requiring a nominal amount of client time. The process begins with a conference to clearly define the scope of the engagement and receive an authorized power of attorney or information authorization, allowing Ryan to obtain the appropriate federal income tax or state tax transcripts. We work with our client to acquire dispositive documents, such as revenue agents’ reports, IRS interest computations if available, statute extensions, and certain pages of returns. Once we have obtained the required information, we complete our review, generally within 60 to 90 days, and present our findings, including a detailed analysis of applicable law. Finally, Ryan prepares and supports the filing of claims for refund, provides a strategic assessment of the appropriate location and specific IRS individuals to work the claim, and follows up with the taxing authority on the review and processing of claims filed, including any supporting technical correspondence that may be required. We also manage the complete appeals process, including drafting the protest and negotiating with the appeals officer. And in the event a case goes to litigation, Ryan will provide advisory support for all technical matters.
